strength and hardiness. The diet of these men is entirely of vegetables and fish, and they are very economical feeders at that. The quantity of food they require, or, at least, the quantity they eat is astonishingly small when compared with the food devoured by the meat-eaters from the Western world. The amount of manual labor they perform is simply prodigious. The coolie who takes the place of and who does the work for which oxen and horses are utilized elsewhere is about as strong and can accomplish about as much heavy work as the beasts of burden they take the place of. They are possessed of immense power of limb, being able to puil loads that would be considered as much as any ordinary draught limb, being able to pull loads that would be considered as much as any ordinary draught animal could draw. It is wonderful to see them walking away with the heavy loads they easily move; and as carriers of burdens upon the shoulder they are capable of startling achievements. Seemingly their frames are ac tough as steel, not susceptible of cold or intense heat—going thinly clad in freezing weather, and not shribking from the sun in its most oppressive season.

Congressional Printing. New York Herald. Congress has adjourned, but, according to dispatches from Washington, the government printing office is still putting in type and in due time will publish hundreds of speeches of ambitious congressmen which were never delivered. They will all go into the Congressional Record, and they will be sent to the constituents of their authors as assectiments of gressional Record, and they will be sent to the constituents of their authors as specimens of their eloquence and oratory. The whole thing is a fraud, a swindle and an outrage on the taxpayers who have to foot the bills. The Congressional Record as it stands now is a congressional lie. It is a record, not of what members said, but of what they would have their constituents believe they said. Why do they impose on the people in this way?

MEDICATED STEAM Vermin Destroyer

DISINFECTANT, NEW AND WONDERFUL INVENTION. AN EFFECTIVE, CERTAIN AND SIMPLE MEANS OF

Destroying Bed Bugs, Cockroaches, Ants, Moths and Parasites of all kinds. Moths and Parasitos of all kinds.

The apparatus for generating the steam is an ordinary nursery lamp holding half a pint of the Medicated Fluid, with a tube at the top to direct the Medicated Steam upon any point infested with insects. It is heated with a small spirit lamp beneath the boiler. For Dwellings, Hotels, Steam Ships, Restaurants & &c., nothing ever discovered equals this appliance. It is harmless to human life; is inexpensive and simple in its use. While a most potent means for destroying Vermin it is the best disinfectant known and may be most effectually used to prevent the spread most effectually used to prevent the spread of contagious diseases, such as Yellow Fever, Scarlet Fever, Typhoid Fever, Diptheria, Small Pox, &c. One trial is the best proof

of the great advantages of this over all other appliances. For sale by Druggists and Gen-eral Dealers. J. C. SPENCER, Proprietor, 532 Washington St., N. Y.
